

Meeting with remarkable Minds

2nd International Psycho-immunology & Psychobiology Research Symposium

Zoom conference from Hornby Island - BC Canada - April 3-4, 2021

"There seems to be no limit to research, for as been truly said, the more the sphere of knowledge grows, the larger becomes the surface of contact with the unknown."

~ William Cecil
Dampier

Unnoticed by most, a quiet revolution is happening in the emerging field of psycho-immunology. This cross-discipline approach has all the earmarks of a disruptive technology - it promises to be fast, effective, simple, inexpensive, and without costly technology. It works on both chronic and acute illnesses in many people, and is also useful for discovering the causes of diseases of unknown etiology.

The intent of this *informal* symposium is to move the practice and science behind psycho-immunology and psychobiology forward, by getting researchers who are passionate about this area together to share data, techniques, models, and results; and to form new friendships and collaborations in an intimate and lively venue.

We'll also be talking about the nature of breakthrough research, and the ways and difficulties in moving this new area of research into academia, mainstream medicine, and widespread use.

"Almost every significant breakthrough is the result of a courageous break with traditional ways of thinking."

~ Stephen Covey

Dates, times, & program schedule

Saturday to Sunday, April 3-4, 2021. Conference hours are 8am until 1pm Pacific (17:00 - 22:00 CEST). The conference will be held online via Zoom. Click here to see [the preliminary schedule](#).

A free conference - Signup here

There are no fees for attending this conference. Click here to [register for this conference](#) on Zoom. It is free and open to the public.

Contact us to become a presenter

You can phone us in Canada: +1-250-509-0514

Or email Dr. Grant McFetridge at grant@peakstates.com with a suggested title, summary of your proposed presentation, short biography, and a preferred time to present.

"Learn from yesterday, live for today, hope for tomorrow. The important thing is not to stop questioning."

-Albert Einstein

Attendees

This conference is ideal for MDs, PhDs and other researchers passionate about the field of psychobiology. Therapists and the lay public might find the specific applications of particular interest too.

For more information

This symposium is being sponsored by the Institute for the Study of Peak States, with offices in Canada, USA, Australia, and the EU. For more information on our research work in psychobiology and psycho-immunology, visit us at www.PeakStates.com.

Our venue on Hornby Island

This small conference is being held by the Institute's research director, Dr. McFetridge, broadcasted from his home on Hornby Island, BC, Canada.

List of presenters

- Grant McFetridge PhD - “Developing treatments using psycho-immunology”
- Prof Brant Cortright, PhD - “Dietary and Holistic Strategies to Achieve Peak Brain Performance”
- Kirsten Lykkegaard DVM, PhD - “Pain treatment - a PeakStates approach”
- Mary Pellicer, MD - "Using psycho-immunology to treat a common cause of pressure headaches”
- Grant McFetridge PhD - “Researching a psycho-immunity treatment for Covid-19”
- Gilli Moorhawk - “Easy ways to access peak experiences and peak states in modern life”
- More to come...

Application examples

To help you know if this conference is of interest to you, here are a few of the psychobiology applications and theoretical models developed in the last few years

- The addictive chemical component of Lyme disease
- The psychobiology and treatment of Asperger’s syndrome
- The psycho-immunology and treatment of the underlying fear causing Obsessive Compulsive Disorder
- The fungal origin and treatment for intrusive thoughts and schizophrenic voices
- The subcellular link between the mind and body
- And more ...

Our textbook *Subcellular Psychobiology Diagnosis Handbook* (2014) has many more examples.

Our appreciation to Nemi Nath for creating this symposium brochure
